Comfort³⁶⁵

- Provides a Comfortable Home at the Lowest Cost
- Uniform Comfort Throughout The Entire Home
- Attractive, Touchscreen Thermostat
- Easy-To-Use Consumer Features

A Truly Comfortable Home

A common problem found in two-story homes is the uneven heating and cooling of the upstairs and downstairs. During the summer, the upstairs is too warm. During the winter the downstairs is too cool.

The Comfort365 solves the problem by automatically controlling heating, cooling and AIRFLOW in two-story homes and providing upstairs and downstairs comfort in all seasons without a zoning panel.

The C365 thermostat monitors the downstairs and upstairs temperatures and automatically adjusts the modulating dampers so that more airflow is directed to the area that needs it for a uniformly comfortable home - Comfort on every floor, in every season.

Eliminates Discomfort Caused by Zoning

In zoning, homeowners may feel and hear the significant jump in airflow when the zoning system changes from both zones calling to only one zone calling. This sudden change in airflow can cause noise and discomfort. The Comfort365 avoids this problem by gradually adjusting the airflow - 2% every 2 minutes for continuous comfort.

Homeowner Features

Nighttime Airflow Option

The Nighttime Airflow Option uses the upstairs sensor to control heating and cooling calls and directs more airflow upstairs while sleeping. To optimize comfort, homeowners can set the desired airflow level in heating and cooling.

Airflow Override Option

The Airflow Override Option enables homeowners to direct more airflow to an area that needs it. For example, during a party, the homeowner may want more airflow to the downstairs

area. The homeowner can easily set the desired airflow, making that area more comfortable and enjoyable.

Easily Upgrade to WiFi

Upgrading to WiFi couldn't be easier. When the homeowner is ready to upgrade to WiFi, the homeowner simply plugs the WiFi version into the same subbase on the wall. No need to call out a contractor.

Touchscreen Thermostat

Your homeowners will appreciate the attractive, touch screen thermostat with high definition LCD display compared to builder model, non-touch thermostats installed in conventional zoning.

Approved By Top Builders

Several top builders have recognized the benefits and value of the Comfort365 and are now using and specifying the Comfort365 for a number of new communities in Southern California.

Lowest Installed Costs

- Fewer components to install and wire means fewer callbacks.
- Eliminates the installation of a bypass duct and bypass damper in areas outside of California where bypass is allowed.
- No need to oversize the ducts.

Meets Title 24

The Comfort365 has no effect on the HVAC equipment. The equipment operates at its rated airflow and return temperature.

Energy Savings

The Comfort365 saves energy by directing more airflow to where and when it is needed eliminating overheating and overcooling areas to make other areas comfortable. The Comfort365 comes with a preset schedule for additional energy savings.

Homeowner Resource:

Homeowner resources are available online at www.Comfort365USA.com, including a consumer video describing the features and outlining the operation of the Comfort365.
